Tianchi Luan

M.Sc. Student in Computer Science | Beihang University | Beijing, China
tcluan@buaa.edu.cn | Website | GitHub

Education

Beihang University — M.Sc. in Computer Science 2024–2027 (expected)
State Key Laboratory of Virtual Reality Technology and Systems
Thesis: 3D Scene Reconstruction Methods Integrating Large Multimodal Models.
Supervisor: Yue Qi.

Beijing Jiaotong University — B.Sc. in Computer Science 2020–2024

Research Interests

3D Scene Reconstruction and Understanding; Visual Geometry Models; Extended Reality (XR).

Research Experience

ParS3R: Hierarchical Semantic 3D Scene Reconstruction

Co-first author; manuscript under review at AAAI 2027.

- Developed a feed-forward 3D reconstruction framework with hierarchical decoding, combining a frozen geometry backbone with trainable appearance features to recover object-to-part semantics from unposed multi-view RGB images.
- Designed and implemented 3D cross-view hierarchy consolidation and tree-distance-aware prototypical triplet learning for fine-grained part discrimination and cross-view consistency.
- Implemented the training and evaluation pipelines and conducted cross-dataset comparisons and ablations on PartScene, a benchmark covering 50 scenes from ScanNet++, Replica, and Tanks and Temples.

Feed-Forward Geometry for Mobile AR Tour Deployment

First author; SSRN preprint.

- Built a Unity/AR Foundation mobile client and Flask backend, integrating pretrained IGGT predictions for 3D semantic mapping, object-level annotation, and AR tour deployment.
- Implemented confidence-weighted $\mathrm{Sim}(3)$ alignment for metric scale recovery, together with reference-view maintenance based on geometric confidence and co-visibility for map-aligned camera pose refinement.
- Evaluated localization on 7-Scenes and Cambridge Landmarks and conducted a 20-participant study with AR-experienced users. Compared with the manual workflow, mean deployment time decreased from 6.3 to 2.3 minutes indoors and from 9.5 to 2.7 minutes outdoors.

Honors and Awards

Graduate Academic Scholarships, Beihang University
Second Class (Year 1); Third Class (Years 2–3).

Second-Class Academic Scholarship, Beijing Jiaotong University
Undergraduate Year 1.

Technical Skills

Programming: C, C++, C#, Python.

3D and AR: Unity, AR Foundation, Blender.

Backend Development: Django, Flask.

Design and Documentation: Adobe Illustrator, Photoshop, Premiere, PowerPoint, LaTeX.

Languages: Chinese (native), English.

Certification: CCF Certified Software Professional (CSP), top 6.29% in the certification session (2023).

Teaching and Academic Service

Teaching Assistant, Visual Modeling Methods 2024–2025; 2025–2026

Reviewer, ICASSP 2027
